

Information Visualisation on the Innovation Services E-catalogue

Elements positioned on the main [Innovation Services](#) page:

Innovation Services

The Innovation Service E-catalogue connects environmental research infrastructures (ENVRIs) with innovators, offering a growing library of services, testing facilities, digital tools and advanced technologies developed across Europe.

We encourage innovation and collaboration among RIs to continuously expand our offerings within the E-catalogue. If you are part of an RI and have developed new services or technologies that could benefit external stakeholders, learn how to add them [here](#).
